Primary school children learn English phonics.

## Online study materials help young English learners make the grade

Times Reporters

Primary school teachers and students in state schools are now able to make use of online teaching skills and learning in English, thanks to the support of the governments of Laos and Australia.

The Lao Ministry of Education and Sports, with the support of the Australian government, has uploaded new materials on YouTube to strengthen English teaching and learning in primary schools.

Over 100 Grade 4 English animated audio tracks have been uploaded to the Teacher Development Videos YouTube channel.

The new Grade 4 English primary school curriculum has been designed using a communicative approach to help children use English and communicate in real-life situations.

There is a strong focus on listening and speaking skills to provide students with plenty of exposure to English and to develop the oral language skills required to enable reading and writing.

Deputy Director of the Foreign Language Resource Centre, Mrs Manoly Dongvan, said "When children learn a new language, they need exposure to that language with multiple opportunities to listen to it. It can be challenging for teachers in Laos to provide the level of input that students need, especially if they do not feel confident about their own English."

The new animated Grade 4 audio tracks posted by the ministry's Research Institute of Educational Sciences were recorded by native English speakers of a range of ages and are very lively.

They include simple monologues and dialogues as well as stories, songs and model pronunciation of phonics. The accompanying animations are composed of illustrations from the Grade 4 English textbooks.

The Grade 4 English teacher guide includes instructions about which tracks to use as well as transcripts of the audio tracks in both English and Lao.

The Research Institute of Educational Sciences has also recently started recording audio tracks to complement the forthcoming Grade 5 curriculum.

In addition to those audio tracks, the Institute's E-learning department released teacher development videos in 2022 to demonstrate the methodology of English phonics instruction, as well as the correct pronunciation and letter formation for the different sounds and letters that students will learn in Grades 3 and 4 English classes.

The videos are dubbed in Sign Language so they are more accessible to all.

Deputy Director General of the Research Institute of Educational Sciences, Mr Khamchan Lattayord, said "We have now reached over 2.6 million views on the dedicated "Teacher Development Videos" YouTube channel. This high audience engagement level proves that teachers greatly appreciate the materials we produce."

## New app allows online purchase of train tickets

Times Reporters

Passengers travelling on the Laos-China Railway can now buy tickets more easily using the LCR app on their mobile phones, with the service coming into effect on March 15.

The Laos-China Railway Company has introduced the app after the number of people using the railway increased dramatically to as many as 10,000 per day since the railway became operational at the end of 2021.

Increasing passenger volume meant that people had to queue for hours at railway stations to buy tickets, as they could only be purchased at stations and a limited number of outlets in Vientiane.

The ticket app has been developed in line with other apps used by the Chinese rail network and offers customers a choice of Lao, Chinese or English languages.

Lao nationals can buy tickets using the app by entering details of their identity card, while foreign nationals can use their passports.

To buy tickets, passengers must enter their name and surname and then check for the availability of tickets on their chosen route. Payment can be made using VISA, UnionPay, WeChat, Alipay or other payment methods, both in Laos and other countries.

When it's time to board the train, passengers must present their identity card or passport used when purchasing the ticket to enter the station by scanning the QR code generated by the ticketing system. Alternatively, people can go to the ticket office at the station to get a paper ticket, which will then be checked before boarding.

Tourists can download the LCR ticket app on the Apple Store or Android operating system. For more information, check the Facebook page of the Laos-China Railway Company Limited.

In addition to passenger volume, the number of freight trains in operation on the Laos-China Railway has increased from two to 12 a day while the categories of goods shipped have grown from about 100 to more than 2,000, according to a statement by China's Foreign Ministry on March 10.

The foreign trade volume handled by the Laos-China Railway reached 633,900 tons in the January-February period, up 320 percent year-on-year, the China State Railway Group said on Tuesday. The foreign trade volume has exceeded 3 million tons since December 2021, the railway operator said.

## Step up malaria controls, health ministry advises Attapeu

Times Reporters

The Ministry of Health has urged the Attapeu provincial Health Department and the general public to make a concerted effort to reduce the number of malaria cases in the province.

The ministry's overriding goal is to eliminate malaria throughout the country by 2030.

During a visit to Attapeu province last week, Deputy Minister of Health Dr Phayvanh Keopaseuth said malaria is one of many chronic health issues in Laos and is also persistent in other Mekong subregion countries.

Most malaria cases in Laos occur in the south of the country, mainly in Attapeu.

According to the Ministry of Health, last year about 1,058 people in Attapeu were diagnosed with malaria, accounting for 46 percent of all cases nationwide. Malaria was recorded in 101 out of 141 villages in the province.

"I want people from all walks of life to participate in efforts to combat malaria over the next seven years, until we reach the target date for the eradication of malaria in 2030," Dr Phayvanh said.

He advised Attapeu health authorities to provide information about malaria and its prevention to local residents and to village health volunteers for distribution within their communities.

Health workers were asked to closely monitor people foraging for food or farming in wooded areas, as they are at greater risk of contracting malaria. Dr Phayvanh said these people should be fully informed about malaria prevention and encouraged to sleep under insecticide-treated nets.

If anyone is suspected of having malaria, health workers should question the person about their movements to determine the likely area where they were infected. In addition, health workers were advised to encourage people to get tested for malaria at a government hospital and not to buy medicine to treat themselves at home.

Dr Phayvanh also advised Attapeu medical personnel to make arrangements for emergency events, saying epidemiology should be strengthened at all levels to reduce disease outbreaks.

He also instructed the Attapeu Health Department to carry out disease risk assessments through surveillance.

Dr Phayvanh Keopaseuth (*standing, centre right*) visits doctors and nurses in Attapeu province.

ຂ່າວ KPL Laos News
March 15 at 10:54 AM ·

MoES, Australian release new materials on YouTube to support English teaching in primary schools

(KPL) The new Grade 4 English primary curriculum developed by the Ministry of Education and Sports (MoES), with support from the Australian Government through the BEQUAL programme, has been designed using a communicative approach to help students use English and communicate in real-life situations.

There is a strong focus on developing listening and speaking skills to provide students with plenty of exposure to English and to develop the oral language skill required to support reading and writing. But pronouncing the sounds and words in English is a new and difficult skill for most teachers in Laos. Without any modelling, teachers won't know how to pronounce the sounds correctly and thus won't be able to teach them.

The Ministry of Education and Sports in Laos has developed a new Grade 4 English primary curriculum with support from the Australian Government through the #BEQUAL program.

The curriculum uses a communicative approach, focusing on developing the skills that are integral to students' reading and writing.

Pronouncing the sounds and words in English presents another challenge for students and teachers.

To provide support with English pronunciation, the Research Institute of Educational Sciences, with support from Australia, has released 105 short, animated Grade 4 audio tracks on the ວິດີໂອສຳລັບການພັດທະນາຄູ Teacher Development Videos YouTube channel.

The audio tracks were recorded by native English speakers and include monologues, dialogues, stories, songs, and model pronunciation of new phonics, which are detailed in The Grade 4 English teacher guide.

Mrs Manoly Dongvan, Deputy Director of Foreign Language Resource Center explains "Using the animated audio materials will enable Lao teachers to give their students plenty of authentic language input..."

### The Ministry of Education and Sports, with the support of the Australian Government, release new materials on YouTube to support English teaching and learning in primary schools.

‹ Previous

Over 100 Grade 4 English animated audio tracks have been uploaded to the ໄອສຳລັບການພັດທະນາຄູ Teacher Development Videos YouTube channel

The new Grade 4 English primary curriculum developed by the Ministry of Education and Sports (MoES), with support from the Australian Government through the BEQUAL program, has been designed using a communicative approach to help students use English and communicate in real-life situations. There is a strong focus on developing listening and speaking skills to provide students with plenty of exposure to English and to develop the oral language skill required to support reading and writing. But pronouncing the sounds and words in English is a new and difficult skill for most teachers in Laos. Without any modelling, teachers won't know how to pronounce the sounds correctly and thus won't be able to teach them.

Mrs Manoly Dongvan, Deputy Director of Foreign Language Resource Center explains "When students learn a new language, they need exposure to the language with multiple opportunities to listen to it. It can be challenging for teachers in Laos to provide the level of input students need, especially if they do not feel confident about their own English. This is why, since the start of English lessons in Grade 3, we have produced audio materials to support the teachers and the students."

The Research Institute of Educational Sciences (RIES) with support from Australia has just released 105 short animated Grade 4 audio tracks on the ວີໂອສຳລັບການພັດທະນາຄູ Teacher Development Videos YouTube channel. The audio tracks are in addition to the 101 Grade 3 English audio tracks produced last year. They were recorded by native English speakers of a range of ages and are very lively. They include simple monologues and dialogues as well as stories, songs and model pronunciation of the new phonics. The accompanying animations are composed of illustrations from the Grade 4 English textbooks. The Grade 4 English teacher guide includes instructions about which tracks to use as well as transcripts of the audio tracks in both English and Lao. RIES has also recently started recording audio tracks to complement the forthcoming Grade 5 curriculum.

"Using the animated audio materials will enable Lao teachers to give their students plenty of authentic language input. They will be able to expose their students to a range of English accents and make lessons more active and entertaining" adds Mrs Manoly.

In addition to those audio tracks, the E-learning department of RIES released three teacher development videos in 2022 to demonstrate the methodology of the English Phonics instruction as well as the correct pronunciation and letter formation for the different sounds and letters that students will learn in Grade 3 and 4 English classes. The videos are dubbed in Sign Language to be more accessible to all.

"Primary teachers and trainers use the videos and the audio materials for lesson preparation and self-learning on the new curriculum teaching techniques and on active learning. They can also play the audio tracks directly in the classroom" explains Mr Khamchan Lattayord, Deputy Director general of RIES. "We have now reached over 2.6 million views on the dedicated "ວິດີໂອສຳລັບການພັດທະນາຄູ Teacher Development Videos" YouTube channel; this high audience engagement level proves that teachers highly appreciate the materials we produce. The materials are also disseminated on Lao Education and Sports TV on Lao Sat Channel 8, tablets for target districts, USB to teachers and on the Khang Panya Lao platform."

This is why, since the start of English lessons in Grade 3, we have produced audio materials to support the teachers and the students."

The Research Institute of Educational Sciences (RIES) with support from Australia has just released 105 short animated Grade 4 audio tracks on the ວິດີໂອສຳລັບການພັດທະນາຄູ Teacher Development Videos YouTube channel. The audio tracks are in addition to the 101 Grade 3 English audio tracks produced last year.

They were recorded by native English speakers of a range of ages and are very lively. They include simple monologues and dialogues as well as stories, songs and model pronunciation of the new phonics. The accompanying animations are composed of illustrations from the Grade 4 English textbooks.

The Grade 4 English teacher guide includes instructions about which tracks to use as well as transcripts of the audio tracks in both English and Lao. RIES has also recently started recording audio tracks to complement the forthcoming Grade 5 curriculum.

"Using the animated audio materials will enable Lao teachers to give their students plenty of authentic language input. They will be able to expose their students to a range of English accents and make lessons more active and entertaining" adds Mrs Manoly.

In addition to those audio tracks, the E-learning department of RIES released three teacher development videos in 2022 to demonstrate the methodology of the English Phonics instruction as well as the correct pronunciation and letter formation for the different sounds and letters that students will learn in Grade 3 and 4 English classes. The videos are dubbed in Sign Language to be more accessible to all.

"Primary teachers and trainers use the videos and the audio materials for lesson preparation and self-learning on the new curriculum teaching techniques and on active learning. They can also play the audio tracks directly in the classroom" explains Mr Khamchan Lattayord, Deputy Director general of RIES. "We have now reached over 2.6 million views on the dedicated "ວິດີໂອສຳລັບການພັດທະນາຄູ Teacher Development Videos" YouTube channel; this high audience engagement level proves that teachers highly appreciate the materials we produce. The materials are also disseminated on Lao Education and Sports TV on Lao Sat Channel 8, tablets for target districts, USB to teachers and on the Khang Panya Lao platform."

## MoES, Australian release new materials on YouTube to support English teaching in primary schools

(KPL) The new Grade 4 English primary curriculum developed by the Ministry of Education and Sports (MoES), with support from the Australian Government through the BEQUAL programme, has been designed using a communicative approach to help students use English and communicate in real-life situations.

There is a strong focus on developing listening and speaking skills to provide students with plenty of exposure to English and to develop the oral language skill required to support reading and writing. But pronouncing the sounds and words in English is a new and difficult skill for most teachers in Laos. Without any modelling, teachers won't know how to pronounce the sounds correctly and thus won't be able to teach them.

Ms Manoly Dongvan, Deputy Director of Foreign Language Resource Center explains "When students learn a new language, they need exposure to the language with multiple opportunities to listen to it. It can be challenging for teachers in Laos to provide the level of input students need, especially if they do not feel confident about their own English. This is why, since the start of English lessons in Grade 3, we have produced audio materials to support the teachers and the students."

The Research Institute of Educational Sciences (RIES) with support from Australia has just released 105 short animated Grade 4 audio tracks on the ?????????????????????? Teacher Development Videos YouTube channel. The audio tracks are in addition to the 101 Grade 3 English audio tracks produced last year.

They were recorded by native English speakers of a range of ages and are very lively. They include simple monologues and dialogues as well as stories, songs and model pronunciation of the new phonics. The accompanying animations are composed of illustrations from the Grade 4 English textbooks.

The Grade 4 English teacher guide includes instructions about which tracks to use as well as transcripts of the audio tracks in both English and Lao. RIES has also recently started recording audio tracks to complement the forthcoming Grade 5 curriculum.

"Using the animated audio materials will enable Lao teachers to give their students plenty of authentic language input. They will be able to expose their students to a range of English accents and make lessons more active and entertaining" adds Mrs Manoly.

In addition to those audio tracks, the E-learning department of RIES released three teacher development videos in 2022 to demonstrate the methodology of the English Phonics instruction as well as the correct pronunciation and letter formation for the different sounds and letters that students will learn in Grade 3 and 4 English classes. The videos are dubbed in Sign Language to be more accessible to all.

**Online study materials help young English learners make the grade**

Primary school teachers and students in state schools are now able to make use of online teaching skills and learning in English, thanks to the support of the governments of Laos and Australia.
The Lao Ministry of Education and Sports, with the support of the Australian government, has uploaded new materials on YouTube to strengthen English teaching and learning in primary schools.

**Primary school children learn English phonics.**

Over 100 Grade 4 English animated audio tracks have been uploaded to the Teacher Development Videos YouTube channel.
The new Grade 4 English primary school curriculum has been designed using a communicative approach to help children use English and communicate in real-life situations.
There is a strong focus on listening and speaking skills to provide students with plenty of exposure to English and to develop the oral language skills required to enable reading and writing.
Deputy Director of the Foreign Language Resource Centre, Mrs Manoly Dongvan, said "When children learn a new language, they need exposure to that language with multiple opportunities to listen to it. It can be challenging for teachers in Laos to provide the level of input that students need, especially if they do not feel confident about their own English."
The new animated Grade 4 audio tracks posted by the ministry's Research Institute of Educational Sciences were recorded by native English speakers of a range of ages and are very lively.
They include simple monologues and dialogues as well as stories, songs and model pronunciation of phonics. The accompanying animations are composed of illustrations from the Grade 4 English textbooks.
The Grade 4 English teacher guide includes instructions about which tracks to use as well as transcripts of the audio tracks in both English and Lao.
The Research Institute of Educational Sciences has also recently started recording audio tracks to complement the forthcoming Grade 5 curriculum.
In addition to those audio tracks, the Institute's E-learning department released teacher development videos in 2022 to demonstrate the methodology of English phonics instruction, as well as the correct pronunciation and letter formation for the different sounds and letters that students will learn in Grades 3 and 4 English classes.
The videos are dubbed in Sign Language so they are more accessible to all.
Deputy Director General of the Research Institute of Educational Sciences, Mr Khamchan Lattayord, said "We have now reached over 2.6 million views on the dedicated "Teacher Development Videos" YouTube channel. This high audience engagement level proves that teachers greatly appreciate the materials we produce."
