Laos, Australia provide grants to boost support for primary school teachers

Times Reporters

The Ministry of Education and Sports and the Australian government have provided extra financial and technical support to 28 target District Education and Sports Bureaus (DESBs) in six provinces through the BEQUAL programme.

Since the new national primary school curriculum was introduced in 2019, the Ministry of Education and Sports, in partnership with the Australian government through the BEQUAL programme, has provided extra support to District Education and Sports Bureaus in Phongsaly, Luang Namtha, Khammuan, Savannakhet, Saravan and Xekong provinces.

The new national primary curriculum is a major change to primary teaching and learning in Laos. It will take time for all teachers to fully understand and apply the new active teaching and learning techniques.

The purpose of the support being provided by the ministry is to build the capacity of target District Education and Sports Bureau staff to help teachers use the new curriculum and supplementary teaching and learning resources.

The support includes grant

Teachers carry out an experiment as part of the new BEQUAL programme.

funding, capacity building of DESB staff, training, and provision of electronic data collection tools.

The school year 2022-23 is the fourth year that the Ministry of Education and Sports and Australia have provided extra grants to target districts, totalling nearly one billion kip. In 2022-23 the grants enabled DESB teams to conduct 4,246 visits to Grade 4 classrooms.

Director General of the ministry's Department of Teacher Education, Keth Phanlak, said "District Education and Sports Bureaus can use the grants to make pedagogical support and monitoring visits to schools and clusters. They are encouraged to give greater priority to visiting schools in remote communities where a high

percentage of children come from non-Lao speaking backgrounds, and to focus on supporting teachers with the use of the new curriculum."

During the school year, DESBs also ensure that teachers receive regular remote follow-up support between in-person visits.

To bring about meaningful change in teachers' behaviour and an improvement in the quality of teaching, it is recommended that teachers receive remote support every two weeks.

Remote support can include a check-in phone call, WhatsApp/SMS messages, help for teachers to arrange peer-observation of a teacher in the same school or a neighbouring school, and support for teachers to give and receive peer support by

identifying another teacher as their "buddy".

Over the years, the District Education and Sports Bureau and BEQUAL teams have observed the benefits of the extra support provided to teachers.

The majority of teachers in the target districts are using active learning practices. The most frequently observed techniques were students working in pairs or groups and teachers using open-ended questioning with students.

The percentage of teachers observed using the assessment approaches is increasing year by year. There were encouragingly high rates of inclusive education practices observed in classrooms by District Education and Sports Bureaus in 2022-23.

In 2023-24, the Australian Government through the BEQUAL programme will continue to support these target districts with grants to complete the implementation of the new primary school curriculum to Grade 5. Grants will also be provided to new target districts to support teacher professional development, in the catchment areas of three Teacher Training Colleges, namely Luang Namtha, Kang Khay, and Savannakhet.

Lao PDR's new national primary curriculum is a major change to primary teaching and learning. The Ministry of Education and Sports #MoES through BEQUAL is providing enhanced pedagogical support for primary teachers in 28 districts through grants, capacity building, and school visits to implement the curriculum.

Monitoring shows that increased pedagogical support leads to improved teaching skills.

In 2022-23 the grants enabled District Education and Sports Bureaus (DESB) teams to conduct 4 246 visits to grade 4 classrooms. In the coming year, the Australian Government through #BEQUAL will continue supporting target districts, providing grants to implement the curriculum up to Grade 5.

MoES, Australia increase pedagogical support for primary teachers in 28 districts

The new national primary curriculum was introduced in 2019, the Ministry of Education and Sports (MoES) of the Lao PDR, in partnership with the Australian government through the BEQUAL programme, has provided extra financial and technical support to 28 target District Education and Sports Bureaus (DESBs) in six provinces – Phongsaly, Luang Namtha, Khammuan, Savannakhet, Saravan and Xekong.

Ministry shows that increased pedagogical support leads to improved teaching skills

ICPEI states the new national primary curriculum was introduced in 2019, the Ministry of Education and Sports (MoES) of the Lao PDR, in partnership with the Australian government through the BEQUAL programme, has provided extra financial and technical support to 28 target District Education and Sports Bureaus (DESBs) in six provinces – Phongsaly, Luang Namtha, Khammuan, Savannakhet, Saravan and Xekong.

The new national primary curriculum is a major change to primary teaching and learning in the Lao PDR. It will take time for all teachers to fully understand and apply the new active teaching and learning techniques. The purpose of the support being provided by MoES is to build the capacity of target DESB staff to help teachers to use the new curriculum and supplementary teaching and learning resources. The support includes grant funding, capacity building of DESB staff, training, and provision of electronic data collection tools.

The school year 2022-23 is the fourth year that Ministry of Education and Sports and Australia provided extra grants to target districts, totally over LAK 979 million. In 2022-23 the grants enabled DESB teams to conduct 4,246 visits to grade 4 classrooms.

"The DESBs can use the grants to make pedagogical support and monitoring visits to schools and clusters. The DESBs are encouraged to give greater priority to visiting schools in remote communities where a high percentage of students come from non-Lao speaking backgrounds, and to focus on supporting teachers with the new curriculum implementation," said Ajan Keth Phanlak, Director General of the Department of Teacher Education at MoES.

During the school year, the DESBs also ensure that teachers receive regular remote follow-up support between in-person visits. To bring about meaningful change in teachers' behaviors and an improvement in the quality of teaching it is recommended that teachers receive remote support every two weeks. Remote support can include a check-in phone call, WhatsApp/SMS messages, support for teachers to arrange a peer-observation of a teacher in the same school or a neighboring school, and support for teachers to give and receive peer support by identifying another teacher to be their "buddy".

Over the years, DESB and BEQUAL teams have observed the benefits of the extra support provided to teachers. The majority of teachers in the target districts are using active learning practices. The most frequently observed techniques were students working in pairs or groups and teachers using open-ended questioning with students. The percentage of teachers observed using the assessment approaches is increasing year by year. There were encouragingly high rates of safe and inclusive education practices observed in classrooms by DESBs in 2022-23.

"Thanks to the grants, I can visit remote schools three times per semester. I use many different tools to support the students like classroom observations, co-teaching, and WhatsApp groups. I can see improvements in the teaching with each visit. I can also see that students are more engaged, participate actively in class activities, and help each other," said Ajan Vilaivone Dengthara, Provincial Trainer in Sekong province.

The feedback from teachers is equally positive. Ajan Syfeung Chanthavilai from Lamam district said: "I teach a multigrade class, grades 2 and 3, which is very challenging. The visits from the DESB helped me to find solutions when I had a problem and gave me advice on how to improve my teaching. I can explain my challenges and the DESB staff can advise me about specific techniques to try. For example, based on advice I received about classroom management I created a classroom rule poster, and a rewarding poster, which help me to reward positive behaviors in class. I can also now understand the student assessment record with the rubrics. I also discuss and share experiences and ideas with the other teachers in my school. And I can send a message to the DESB or the WhatsApp groups if I have a question."

In 2023-24, the Australian Government through the BEQUAL programme will continue to support these target districts with grants to complete the implementation of the new primary curriculum to Grade 5. Grants will also be provided to seven target districts to support teacher professional development, in the catchment areas of three Teacher Training Colleges (TTC), Luang Namtha TTC, Kang Khay TTC, and Savannakhet TTC.

This transition will ensure Australian government support continues to align with the priorities of MoES' Education and Sports Sector Development Plan, which include building on curriculum renewal achievements through a focus on continuing professional development for teachers. The shared goal of Australia and the Lao PDR in making this transition is to improve teaching quality and student learning outcomes, with TTCs at the centre of MoES' new national teacher continuous professional development system.

MoES, Australia Increase Pedagogical Support For Primary Teachers In 28 Districts

June 12, 2023 0 Admin 0 Comments Off

Since the new national primary curriculum was introduced in 2019, the Ministry of Education and Sports (MoES) of the Lao PDR, in partnership with the Australian government through the BEQUAL programme, has provided extra financial and technical support to 28 target District Education and Sports Bureaus (DESBs) in six provinces – Phongsaly, Luang Namtha, Khammuan, Savannakhet, Saravan and Xekong.

The new national primary curriculum is a major change to primary teaching and learning in the Lao PDR. It will take time for all teachers to fully understand and apply the new active teaching and learning techniques. The purpose of the support being provided by MoES is to build the capacity of target DESB staff to help teachers to use the new curriculum and supplementary teaching and learning resources. The support includes grant funding, capacity building of DESB staff, training, and provision of electronic data collection tools.

The school year 2022-23 is the fourth year that Ministry of Education and Sports and Australia provided extra grants to target districts, totally over LAK 979 million. In 2022-23 the grants enabled DESB teams to conduct 4,246 visits to grade 4 classrooms.

"The DESBs can use the grants to make pedagogical support and monitoring visits to schools and clusters. The DESBs are encouraged to give greater priority to visiting schools in remote communities where a high percentage of students come from non-Lao speaking backgrounds, and to focus on supporting teachers with the new curriculum implementation," said Ajan Keth Phanlak, Director General of the Department of Teacher Education at MoES.

During the school year, the DESBs also ensure that teachers receive regular remote follow-up support between in-person visits. To bring about meaningful change in teachers' behaviors and an improvement in the quality of teaching it is recommended that teachers receive remote support every two weeks. Remote support can include a check-in phone call, WhatsApp/SMS messages, support for teachers to arrange a peer-observation of a teacher in the same school or a neighboring school, and support for teachers to give and receive peer support by identifying another teacher to be their "buddy".

Over the years, DESB and BEQUAL teams have observed the benefits of the extra support provided to teachers. The majority of teachers in the target districts are using active learning practices. The most frequently observed techniques were students working in pairs or groups and teachers using open-ended questioning with students. The percentage of teachers observed using the assessment approaches is increasing year by year. There were encouragingly high rates of safe and inclusive education practices observed in classrooms by DESBs in 2022-23.

"Thanks to the grants, I can visit remote schools three times per semester. I use many different tools to support the teachers like classroom observations, co-teaching, and WhatsApp groups. I can see improvements in the teaching with each visit. I can also see that students are more engaged, participate actively in class activities and help each other," said Ajan Vilaivone Dengthara, Provincial Trainer in Sekong province.

The feedback from teachers is equally positive. Ajan Syfeung Chanthavilai from Lamam district said: "I teach a multigrade class, grades 2 and 3, which is very challenging. The visits from the DESB helped me to find solutions when I had a problem and gave me advice on how to improve my teaching. I can explain my challenges and the DESB staff can advise me about specific techniques to try. Since the new national primary curriculum was introduced in 2019, the Ministry of Education and Sports (MoES) of Lao PDR, in partnership with the Australian government through the BEQUAL program, has provided extra financial and technical support to 28 target District Education and Sports Bureaus (DESBs) in six provinces – Phongsaly, Luangnamtha, Khammouane, Savannakhet, Salavan and Sekong.

The new national primary curriculum is a major change to primary teaching and learning in Lao PDR. It will take time for all teachers to fully understand and apply the new active teaching and learning techniques. The purpose of the support being provided by MoES is to build the capacity of target DESB staff to help teachers to use the new curriculum and supplementary teaching and learning resources. The support includes grant funding, capacity building of DESB staff, training, and provision of electronic data collection tools.

The school year 2022-23 is the fourth year that Ministry of Education and Sports and Australia provided extra grants to target districts, totaling 979,521,000 LAK. In 2022-23 the grants enabled DESB teams to conduct 4,246 visits to grade 4 classrooms.

Ajan Keth Phanlak, Director General of the Department of Teacher Education at MoES said "The DESBs can use the grants to make pedagogical support and monitoring visits to schools and clusters. The DESBs are encouraged to give greater priority to visiting schools in remote communities where a high percentage of students come from non-Lao speaking backgrounds, and to focus on supporting teachers with the new curriculum implementation."

During the school year, the DESBs also ensure that teachers receive regular remote follow-up support between in-person visits. To bring about meaningful change in teachers' behaviors and an improvement in the quality of teaching it is recommended that teachers receive remote support every two weeks. Remote support can include a check-in phone call, WhatsApp/SMS messages, support for teachers to arrange a peer-observation of a teacher in the same school or a neighboring school, and support for teachers to give a receive peer support by identifying another teacher to be their "buddy".

Over the years, DESB and BEQUAL teams have observed the benefits of the extra support provided to teachers. The majority of teachers in the target districts are using active learning practices. The most frequently observed techniques were students working in pairs or groups and teachers using open-ended questioning with students. The percentage of teachers observed using the assessment approaches is increasing year by year. There were encouragingly high rates of safe and inclusive education practices observed in classrooms by DESBs in 2022-23.

Ajan Vitavone Dengdara, Provincial Trainer in Sekong province. She said "Thanks to the grants, I can visit remote schools three times per semester. I use many different tools to support the teachers like classroom observations, co-teaching, and WhatsApp groups. I can see improvements in the teaching with each visit. I can also see that students are more engaged, participate actively in class activities and help each other."

The feedback from teachers is equally positive. Ajan Syfeung Chanthavilai from Lamam district said: "I teach a multigrade class, grades 2 and 3, which is very challenging. The visits from the DESB helped me to find solutions when I had a problem and gave me advice on how to improve my teaching. I can explain my challenges and the DESB staff can advise me about specific techniques to try. For example, based on advice I received about classroom management I created a classroom rule poster, and a rewarding poster, which help me to reward positive behaviour in class. I can also now understand the student assessment record with the rubrics. I also discuss and share experiences and ideas with the other teachers in my school. And I can send a message to the DESB or the WhatsApp groups if I have a question."

In 2023-24, the Australian Government through the BEQUAL program will continue to support these target districts with grants to complete the implementation of the new primary curriculum to Grade 5. Grants will also be provided to new target districts to support teacher professional development in the catchment areas of three Teacher Training Colleges (TTC), Luang Namtha TTC, Keng Khay TTC, and Savannakhet TTC.

This transition will ensure Australian government support continues to align with the priorities of MoES Education and Sports Sector Development Plan, which include building on curriculum renewal achievements through a focus on continuing professional development for teachers. The shared goal of Australia and Lao PDR in making this transition is to improve teaching quality and student learning outcomes, with TTCs at the centre of MoES' new national teacher continuous professional development system.

Enhancing education support in 28 District Education and Sports Bureaus in Lao PDR

Since the introduction of the new national primary curriculum in 2019, the Ministry of Education and Sports (MoES) of Lao PDR has been working in collaboration with the Australian government through the BEQUAL program to provide additional financial and technical support to 28 target District Education and Sports Bureaus (DESBs) across six provinces – Phongsaly, Luangnamtha, Khammouane, Savannakhet, Salavan and Sekong.

Capacity building for teachers in Lao PDR

Recognising that it takes time for teachers to fully grasp and apply the new active teaching and learning techniques, MoES has taken the initiative to build the capacity of DESB staff to assist teachers in utilising the new curriculum and supplementary teaching resources.

Visiting remote schools, Salavan province

The support package includes grant funding, capacity-building programs for DESB staff, training sessions, and the provision of electronic data collection tools.

The grant funding enables DESB teams to visit schools and clusters for pedagogical support and monitoring. The DESBs are encouraged to prioritise visiting schools in remote communities with a high percentage of students from non-Lao speaking backgrounds.

"The DESBs can use the grants to make pedagogical support and monitoring visits to schools and clusters. The DESBs are encouraged to give greater priority to visiting schools in remote communities where a high percentage of students come from non-Lao speaking backgrounds, and to focus on supporting teachers with the new curriculum implementation." – Ajan Keth Phanlak, Director General of the Department of Teacher Education at MoES

Over the years, DESB and BEQUAL teams have observed the positive impact of the extra support provided to teachers. Most teachers in the target districts have embraced active learning practices, frequently using techniques such as collaborative group work among students and open-ended questioning by teachers.

During the 2022-23 school year, the Ministry of Education and Sports and Australia provided extra grants to target districts, totaling 979,521,000 LAK (79000 AUD). These grants enabled DESB teams to conduct 4,246 visits to grade 4 classrooms.

Looking ahead to the academic year 2023-24, the Australian Government, through the BEQUAL program, will continue supporting these target districts by providing grants to facilitate the complete implementation of the new primary curriculum up to Grade 5.

Additionally, grants will be extended to new target districts to support teacher professional development in the three Teacher Training Colleges (TTCs) catchment areas: Luang Namtha TTC, Keng Khay TTC, and Savannakhet TTC.
