Laos, Australia launch new tool to strengthen teaching quality

Times Reporters

The Ministry of Education and Sports and Australian educators have compiled and introduced the Teacher Self-Assessment tool to improve teaching quality, help teachers reflect on their performance, identify professional learning needs, and improve classroom teaching.

The Australian government supported the Teacher Self-Assessment tool through the BEQUAL programme.

This latest initiative to support ongoing teaching reforms was launched on Tuesday at a ceremony chaired by the Director General of the Department of Teacher and Educational Administration Development, Dr Lamphoune Luangxay, and Second Secretary at the Australian Embassy to Laos, Ms Kate Goodfruit.

The rollout of the assessment tool marks further progress in teachers' professional development and efforts to improve the quality of primary education across Laos.

Dr Lamphoune said the Teacher Self-Assessment tool is an important step forward in enabling teachers to reflect on their classroom delivery, strengthen their skills, and better respond to the needs of students.

"By linking Teacher Self-Assessment with the Primary Teaching Standards, we are building a stronger system that supports teaching quality and contributes to better learning outcomes for all children."

He expressed sincere appreciation to Australia for its long-standing partnership and continued technical and financial support through BEQUAL, which has played an important role in helping the Ministry of Education and Sports develop this tool.

Ms Kate Goodfruit said "This launch reflects the strong collaboration between the education ministry and Australia through BEQUAL, as well as across departments and Teacher Training Colleges. Together, we share a commitment to strengthening the foundations of basic education."

By helping teachers identify their learning needs and improve their classroom practices, the assessment materials will contribute to more effective teaching.

In turn, better teaching leads to stronger student engagement, deeper learning and improved learning outcomes, helping young

The Teacher Self-Assessment tool for primary teachers will help teachers reflect on their performance, identify professional learning needs and improve classroom teaching

Key stakeholders from central and subnational level of MoES and development partners joined the TSA launch

The Ministry of Education and Sports (MoES), with support from Australia through the BEQUAL program, will officially launch the Teacher Self-Assessment (TSA) tool on 4 August 2026 in a meeting chaired by Dr. Lamphoune Loungpa, Director General of Department of Teacher and Educational Administration Development (DTEAD) and Ms. Kate Goodhull, Second Secretary, Australian Embassy. The launch marks an important milestone in sustained efforts to strengthen teacher professional development and improve the quality of primary education across Lao PDR. The launch event will bring together key stakeholders from the central and subnational level, including DTEAD, Department of General Education, Services, all eight Teacher Training Colleges (TTCs) and development partners.

Dr. Lamphoune said *"The Teacher Self-Assessment tool is an important step forward in supporting our teachers to reflect on their practice, strengthen their skills and better respond to the needs of students. By linking the TSA with the Primary Teaching Standards, we are building a stronger system that supports teaching quality and contributes to better learning outcomes for all children. I would like to express our sincere appreciation to Australia for its long-standing partnership and continued technical and financial support through BEQUAL, which has played an important role in helping MoES develop this tool."*

The TSA tool was first developed in 2025 alongside the Primary Teaching Standards by DTEAD, with support from Australia through BEQUAL, in cooperation with other departments and several TTCs. It was piloted in three districts with 30 teachers, and following the first pilot, revisions were made to improve the tool. It was then scaled up during the 2025–2026 school year to all Internal Pedagogical Support staff in 1124 schools, providing valuable feedback from the field. Based on this second pilot, DTEAD and BEQUAL carried out a further round of revisions to ensure the tool is practical, relevant and ready for wider use.

Ms. Kate Goodhull said *"This launch reflects the strong collaboration between MoES and Australia through BEQUAL, as well as across departments and Teacher Training Colleges. Together, we share a commitment to strengthening the foundations of basic education. By helping teachers identify their learning needs and improve their practice, the TSA will support more effective teaching in the classroom. In turn, better teaching leads to stronger student engagement, deeper learning and improved learning outcomes, helping young people develop the skills and confidence they need for the future."*

Ms. Kate Goodhull, Australian Embassy and Dr. Lamphoune Loungpa, Ministry of Education and Sports of Lao PDR

The tool will help teachers reflect on their challenges and learning needs to improve teaching

The launch of the TSA tool is an important step in strengthening the teacher development system in Lao PDR. It will help ensure that teacher learning is targeted, practical and connected to classroom realities, while also supporting the broader national goal of improving the quality of education for all students. The launch meeting presentations and discussions will aim to build a shared understanding of the TSA, identify the conditions needed for effective implementation, clarify roles and responsibilities across MoES departments, and map pathways for integrating the tool into existing systems such as teacher Continuing Professional Development, appraisals, academic title awards and the Fundamental Quality Standards ("FQS") quality assurance system.

Dr. Lamphoune concluded *"I would like to thank all departments, Teacher Training Colleges, teachers and development partners who have contributed to the development of this tool. Together, we are taking an important step toward stronger teaching, better support for teachers, and improved learning for our students. With the TSA now ready for launch, our task is to work together to support its effective use across the system. If we can help teachers grow in confidence and skill, we will also help our students learn better and build a stronger future for Lao PDR."*

Ms. Kate Goodhull added *"Supporting teachers is one of the most meaningful ways to strengthen education. Through BEQUAL, Australia is proud to work alongside MoES in this shared effort to build a workforce of confident, capable teachers who can deliver quality learning for every child. This is an investment not only in schools, but in the future skills and capabilities of Lao PDR."*

The objective of Teacher Self-Assessment tool is to strengthen teaching quality

MoES And Australia Unveil Teacher Self-Assessment Tool To Enhance Education Quality

August 5, 2026 lwadmin Comments Off

Vientiane: The Ministry of Education and Sports (MoES), with support from Australia through the BEQUAL program, is set to officially launch the Teacher Self-Assessment (TSA) tool on 4 August 2026. The event, chaired by Dr. Lamphoune Laungxay, Director General of the Department of Teacher and Educational Administration Development, and Ms. Kate Goodfruit, Second Secretary at the Australian Embassy, marks a significant advancement in efforts to enhance teacher professional development and improve primary education quality in Lao PDR.

According to Lao News Agency, the launch event will gather key stakeholders from various levels, including the Department of Teacher and Educational Administration Development (DTEAD), Department of General Education, Department of Organisation and Personnel, Department of Education Quality Assurance (DEQA), Department of Finance and Planning, eight target Provincial Education and Sports Services, all eight Teacher Training Colleges (TTCs), and development partners. Dr. Lamphoune
emphasized the TSA's role in enabling teachers to reflect on their practices, enhance their skills, and better meet student needs. He expressed gratitude to Australia for its ongoing partnership and support via BEQUAL, which has been instrumental in the tool's development.

Laos, Australia launch new tool to strengthen teaching quality

The Ministry of Education and Sports and Australian educators have compiled and introduced the Teacher Self-Assessment tool to improve teaching quality, help teachers reflect on their performance, identify professional learning needs, and improve classroom teaching.

The Australian government supported the Teacher Self-Assessment tool through the BEQUAL programme.

This latest initiative to support ongoing teaching reforms was launched on Tuesday at a ceremony chaired by the Director General of the Department of Teacher and Educational Administration Development, Dr Lamphoune Luangsay, and Second Secretary at the Australian Embassy to Laos, Ms Kate Goodfruit.

The rollout of the assessment tool marks further progress in teachers' professional development and efforts to improve the quality of primary education across Laos.

Dr Lamphoune said the Teacher Self-Assessment tool is an important step forward in enabling teachers to reflect on their classroom delivery, strengthen their skills, and better respond to the needs of students.

"By linking Teacher Self-Assessment with the Primary Teaching Standards, we are building a stronger system that supports teaching quality and contributes to better learning outcomes for all children."

He expressed sincere appreciation to Australia for its long-standing partnership and continued technical and financial support through BEQUAL, which has played an important role in helping the Ministry of Education and Sports develop this tool.

Ms Kate Goodfruit said "This launch reflects the strong collaboration between the education ministry and Australia through BEQUAL, as well as across departments and Teacher Training Colleges. Together, we show a commitment to strengthening the foundations of basic education."

By helping teachers identify their learning needs and improve their classroom practices, the assessment materials will contribute to more effective teaching. In turn, better teaching leads to stronger student engagement, deeper learning and improved learning outcomes, helping young people develop the skills and confidence they need for the future, Ms Goodfruit said.

The Teacher Self-Assessment tool will help ensure that teacher learning is targeted, practical and connected to classroom realities, while also supporting the broader national goal of improving the quality of education for all students.

Ms Goodfruit said that supporting teachers is one of the most meaningful ways to improve education.

Through the BEQUAL programme, Australia is proud to work alongside the education ministry in this shared effort to build a workforce of confident, capable teachers who can deliver quality learning for every child. This is an investment not only in schools, but in the future skills and capabilities of Laos.
